JOURNEY TO ANTARCTICA: THE WHITE CONTINENT WITH NAT GEO

Antarctica may be at the end of the Earth, but we've been bringing guests here for decades—safely sharing all the wonders of this vast land and sea. Join us to experience the thrill of crunching through the sea ice aboard our fleet of three state-of-the-art expedition ships to see scores of penguins and whales. People come for the wildlife but fall in love with the ice: an entire museum of colossal and magical ice forms defying description. And you'll get a front seat to the dashing history of the Heroic Age of Exploration. Armed with a flexible itinerary that allows us to go where conditions are best and wildlife is most active, we'll experience all the splendor of Antarctica. Venture into channels and coves framed by towering peaks. Watch whales play off the bow; glide around enormous icebergs in Zodiacs; photograph penguin colonies with a National Geographic photographer; and hike, kayak, and even possibly cross-country ski in complete tranquility.

ITINERARY

DAY 1: Buenos Aires, Argentina (National Geographic Explorer & National Geographic Endurance) or Santiago (National Geographic Resolution)
Arrive in Buenos Aires (Explorer or Endurance) or Santiago (Resolution). Settle into the Alvear Art Hotel (or similar, Explorer) or Alvear Icon (or similar, Endurance) before seeing the city's Beaux-Arts palaces and the famous balcony associated with Eva

Perón. Or check into the Hotel Santiago by Mandarin (or similar, Resolution) before our guided overview of this vibrant city backed by the inspiring Andes. Discover sites like the Plaza de Armas and get a feel for the mix of old and new that makes this city so great. This area is excellent for photos! (L)

DAY 2: Fly to Ushuaia, Argentina / Embark

Today we fly south to Ushuaia, the southernmost city in the world, where we meet our ship. Ushuaia's spectacular setting, between the jagged peaks of the Cordillera Darwin and the protected waters of the Beagle Channel, makes it an appropriately wild place to begin our journey to the White Continent and a great destination in its own right. While we're there, we visit Tierra del Fuego National Park, where we can view a beautiful forest of southern beech, very much like those that covered Antarctica millions of years ago. Lunch will be served onboard a private catamaran while cruising the Beagle Channel, where we'll be on the lookout for huge South American sea lions and birds like imperial cormorants. Residents of Ushuaia often call their small city 'El Fin Del Mundo', The End of the World, but for us, it's just the beginning. (B,L,D)

DAY 3: At Sea Crossing the Drake Passage

This 500-mile-wide strait between South America and the Antarctic Peninsula is one of the most famous bodies of water in the world. Sometimes ferocious, sometimes flat calm, the Drake is always a fascinating place in its own right. This part of the journey is our best opportunity to see gorgeous seabirds like the wandering albatross, and we might be lucky enough to encounter killer whales or rare species of dolphins. This is also a day to get to know our ship and prepare for the adventures ahead. Visit the Bridge (a great place to spot wildlife), have a relaxing massage, attend a talk about the biology of the

penguins you'll soon be seeing, or settle into a comfy chair in the observation lounge, look out over the waves and reflect on the incredible history of this fabled passage. If it does get a little rough, just take a couple of nice naps; we'll be in Antarctica before you know it. (B,L,D)

DAY 4: Exploring Antarctica

The Antarctic Peninsula stretches over 800 miles from north to south, a spine of craggy peaks cut by dozens of deep fjords. It's an enormous region with many different faces and ever-changing weather, which is what makes Lindblad Expeditions' long experience here so important. Five decades of exploration has given us an unparalleled knowledge of the region, allowing us to stay flexible and respond to changing conditions, turn on a dime and select the optimal activity for each day. We plan to be out daily, exploring in our Zodiacs, hiking at penguin colonies, discovering remote bays, photographing wildlife, and learning fascinating details from the naturalists and other experts who accompany us on every excursion. (B,L,D)

DAY 5: Exploring Antarctica

Ice! It's probably the very first thing most people think about when the topic of Antarctica comes up, and once you're here it never disappoints. From icebergs the size of islands to the fragile, nearly invisible layers glistening on the surface where the sea has just begun to freeze, from near-vertical glaciers pouring down the slopes of every mountain to the endless landscapes of sea ice, frozen ocean stretching to the horizon in every direction, ice defines the Antarctic. You'll get to know it up close and personal, hiking, kayaking and cruising in the Zodiacs through this frozen world. (B,L,D)

DAY 6: Exploring Antarctica

Our sturdy Zodiac landing craft are really the heart and soul of our explorations in the Antarctic. These tough, stable little motorized boats maneuver easily through ice-choked waters, getting us ashore safely in even the most remote and challenging locations. And simply cruising in the Zodiacs is just as much fun. What's around the next corner? A leopard seal relaxing on an ice floe or a chance to photograph an exquisite arched iceberg that no one has ever seen before? We never know until we get there, but it's always a thrill. (B,L,D)

DAY 7: Exploring Antarctica

Penguins, without any doubt, are the most popular residents of Antarctica, and we have many chances to get to know them well. Their colonies are almost always close to the beach, so it's very easy to get great photos. In the short Antarctic summer these amazing birds are always busy with the many tasks of breeding and raising their chicks, so every month brings something new. In November the adults are squabbling over the pebbles they use to build their nests. By late December the first chicks are tucked in under their parents, peeping out at the world. And in February the chicks have left their nests and are very active, learning to swim and getting ready to fend for themselves. (B,L,D)

DAY 8: Exploring Antarctica

Everywhere we go in the Antarctic we're surrounded by opportunities to capture uniquely beautiful images with our cameras. Whether we are cruising past spectacular glaciers in the ship, getting close to seals in the Zodiacs, or hiking around the penguin colonies, we are always in the company of an expert National Geographic photographer and a Lindblad photo instructor who share what they see and help us to perfect both

the art and the technique of our own photography. The impossibly gorgeous blue in the heart of an iceberg, a penguin tenderly feeding its tiny chick or a glorious sunset over frozen ocean, shots like these surround us every day. Learning to capture these perfect moments is both a wonderful challenge and a huge thrill. (B,L,D)

DAY 9: Exploring Antarctica

Really exploring Antarctica also means simply relaxing and watching while our ship cruises through some of the most spectacular scenery on Earth. Grab a cup of cocoa and a comfortable seat in the Observation Lounge or visit the officers on the Bridge; bundle up and climb all the way up to the Monkey Deck for a really panoramic view, or just kick back in your cabin and watch for seals on ice or whales blowing in the distance. We make transits of world-famous passages like the Lemaire Channel and Antarctic Sound and go ashore on the continent itself, but we also visit equally amazing islands and places that you've never heard of, yet! (B,L,D)

DAY 10-11: At Sea

Enjoy the ship's amenities as the coast of Antarctica disappears from view. Round the southernmost tip of South America and see the meeting of the Atlantic and Pacific Oceans. Take some time to go through your photos. Send a message home to friends and family saying: "Don't want this to end!" And celebrate your voyage at a farewell dinner on board. (B,L,D)

DAY 12-13: Disembark Ushuaia / Fly to Buenos Aires (Explorer, Endurance) or Santiago (Resolution) / Home

Today we disembark in Ushuaia. Fly by private charter flight to Buenos Aires or Santiago and connect with your overnight flight home. (Day 12: B,L)

YOUR SHIP: NATIONAL GEOGRAPHIC ENDURANCE

YOUR SHIP:	National Geographic Endurance
VESSEL TYPE:	Expedition Ship
LENGTH:	
PASSENGER CAPACITY:	126
BUILT/REFURBISHED:	2018

A next-generation expedition ship, purpose-built for polar navigation. National Geographic Endurance is a next-generation expedition ship, purpose-built for polar navigation. A fully stabilized, highly strengthened, ice-class Polar Code PC5 (Category A) vessel, it is designed to navigate polar passages year-round, and safely explore uncharted waters, while providing exceptional comfort. Its patented X-BOW® is key to its design; its powerful wave-slicing action provides an extremely smooth ride in even adverse conditions, and even reduces spray on deck, for superior observation. She carries a full suite of expedition tools and offers a variety of experience-enhancing amenities. The luxury of comfort on expedition National Geographic Endurance comfortably accommodates 126 guests in 69 outside-facing cabins. Cabins are efficiently designed, with sizes range from the 140-square-foot solo cabin to the 430-square-foot category 7 suite. Fifty-three of the 69 cabins, including all 12 of the solo cabins, will feature small balconies with floor-to-ceiling sliding doors that bring in the spectacular views and ample natural light. Comfort & convenience in every room Every cabin has two portholes, a large window or balcony, and temperature controls. Bathrooms are modern and stocked

with botanically inspired hair products, soap, and shower gel, plus a hairdryer. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Dining: Food served aboard is fresh, local, and delicious, and sourced from suppliers who share our values of sustainable use whenever possible. Meals aboard are almost always served in the dining room, located aft of the lounge deck. When weather conditions allow, lighter fare may be served on the observation deck. There is no assigned seating and our dining room accommodates the entire expedition community in a single seating. During meals your expedition leader, naturalists, and any guest speakers aboard will join you. Public Areas: Two restaurants, a Chef's Table for small group dining, Observation Lounge with bar, gym, Wellness area, infinity-style outdoor hot tubs, library, main lounge with full service bar, 24-hour beverage, state-of-the-art facilities for films, slideshows and presentations, and a photo workshop area; plus, an expedition base with lockers for expedition gear, and an "open bridge" for access to our captain, officers and the art of navigation. Meals: Two restaurants, featuring local, sustainable choices and unassigned seating for flexible, inclusive dining; plus a Chef's table for intimate, small group dining. Main restaurant has 270° views, and the Observation deck restaurant features lighter, made-to-order fare. Cabins: All cabins face outside with large windows, private facilities and climate controls. 53 cabins have balconies. Cabins are equipped with expedition command centers with tablets and USB/mobile device docking, TVs, Wi-Fi connections, and hair dryers. Expedition Tools: Zodiac landing craft, kayaks,

snowshoes, cross-country skis, undersea specialist operating a remotely Operated Vehicle (ROV) and underwater video camera for unique access to polar marine world, hydrophone, aerial remote-controlled camera and video microscope. Special Features: A full-time doctor, undersea specialist, National Geographic photographer, Lindblad-National Geographic certified photo instructor and video chronicler, an internet cafe and laundry. Wellness: The vessel is staffed by our wellness specialists and features a glass-enclosed yoga studio, gym, treatment rooms and spa relax area, and high- and low-heat saunas with ocean views. Expedition Landing Craft: Key to our operation is our fleet of expedition landing craft, which we use to land in places that would otherwise be inaccessible. With 8 of these boats and two loading stations used every time we disembark, we're able to transfer guests off the ship quickly, so you can be out on adventures, not idly waiting. The expedition landing craft we use are 19 feet long, powered by four-stroke outboard engines, and are capable of comfortably carrying 10-12 people. They are widely recognized as the safest and most versatile small boats afloat. Remotely Operated Vehicle: Capable of reaching 1,000 feet, far beyond the range of any Scuba diver, the ROV allows you to literally view parts of the undersea that are as unexplored as the moon. Chances are you, like many of our guests, will be struck by how surprisingly colorful undersea life is in these unlikely places. And this glimpse may fundamentally change how you view the ocean. Kayaks: National Geographic Endurance will be equipped with a fleet of kayaks large enough to ensure everyone who wants to can paddle at every opportunity. Consequently, prior kayaking experience isn't necessary--many of our guests have their first kayaking experience in extraordinary locations. Our custom-designed floating platform lets us deploy kayakers from

the ship, or any location we want--including far from shore. Kayakers are usually free to explore where they want within boundaries set by the undersea specialist and officer of the watch. Underwater camera: Our undersea specialist will dive often during your expedition, even in Alaska, with cold-water gear, to shoot high-definition, Cousteau-like footage of the deep. Colorful nudibranchs, swimming, plant-like crinoids, and mysterious fish with antifreeze blood that thrive in the frigid sea will give you an entirely new appreciation of the marine environment. Video microscope: Naturalists will use the video microscope to help explain all elements of the environment, including tiny organisms that are the building block of the marine ecosystem. Spellbinding live views of krill at 80x magnification fills the high-definition screens in the lounge with vivid detail, and fills every onlooker with a sense of wonder at the importance of otherwise unobservable creatures. Hydrophone: This underwater microphone is deployed to listen to the vocalizations of marine mammals. Real time transmissions of their eerie, haunting sounds can be broadcast through the ship or recorded for later playback. Few experiences in nature are as captivating as watching humpback whales feed close to the ship as their vocalizations play through the ship's PA system. Electronic charts: An electronic chart showing the ship's location, course, and speed is almost always on display in the lounge. Open bridge: You'll find our captains are engaged, knowledgeable members of your expedition who are eager to share their passion with you. Venture's open bridge features comfortable spaces to sit, enjoy the view, drink your morning coffee, or simply chat with the officers. Snorkeling gear & wetsuits: On warm weather itineraries where there will be snorkeling, you'll select a mask, snorkel, fins, and wetsuit that remain yours for the duration of the expedition. There's no need
