NORTHWEST PASSAGE 16 DAY ADVENTURE CRUISE

Welcome to Aurora's Northwest Passage expedition. The labyrinthine channels of the legendary Northwest Passage have enchanted explorers and adventurers for centuries. Get a glimpse into the world that captivated early explorers such as Franklin, Amundsen and Larsen, by exploring a portion of the fabled Northwest Passage. Visit the final resting places of some of the legendary explorers to have ventured here and experience the archipelago of islands and channels that make up Canada's High Arctic region. Along the way, we hope to meet local indigenous people who call this remote wilderness home, and perhaps catch glimpses of the wildlife that inhabit the region: polar fox, bowhead whale, polar bear and the elusive narwhal. We may encounter the variable sea ice that once prevented ships from traversing the Northwest Passage, adding a compelling element of adventure that is integral to any genuine expedition. Aurora Expeditions operates in remote and challenging environments, and in the spirit of expedition travel, we encourage you to adopt a flexible and adventurous attitude when joining our voyages. This itinerary is a guide only and is subject to change due to weather, sea state and other conditions beyond our control. On this voyage, we visit remote Inuit hamlets and settlements, where the local Inuit people still practice traditional hunting methods including whaling that some people may find confronting. If you find yourself feeling upset and disturbed by what you see, please alert a member of the expedition team immediately, who will do their best to address your concerns and take action to mitigate the problem, wherever possible.

ITINERARY

Day 1 Arrive Toronto

Having made your way to Toronto, check in at our group hotel at Toronto Airport. Please visit the Aurora Expeditions hospitality desk to collect your luggage cabin tags and to speak with our ground operations team, who may have information to share with you about pre-embarkation procedures and also the charter flight to Nuuk tomorrow. You will receive Aurora Expeditions cabin tags for your luggage. Please clearly label the tags with your name and ship cabin number.

Accommodation: Westin Toronto Airport Hotel (or similar)

Day 2 Embarkation, Cambridge Bay

into the mountains, where you will find spectacular vantage points.

Approximately 4,500 years ago, the Saqqaq culture arrived from Canada and settled in the area. They lived here for approximately 2,000 years, after which they mysteriously disappeared from the area. The Dorset culture arrived around 500 CE and stayed until the 1200s until they were replaced by the Thule culture, and today, the majority of the population of Sisimiut are descendants of the Thule culture.

Day 4 Ilulissat

Known as the 'birthplace of icebergs', this region produces some of the most dazzling icebergs found anywhere on Earth. Hike to the UNESCO World Heritage-listed Icefjord and stand in awe at its immensity. Sermeq Kujalleq, also known as Jakobshavn Glacier, is the most productive glacier - not only in Greenland but the entire Northern Hemisphere. It produces 20 million tonnes of ice each day, all floating into the Ilulissat Icefjord and Disko Bay. Conditions permitting, enjoy a Zodiac cruise at the mouth of the fjord and kayak through sea ice and icebergs. An optional 90-minute helicopter flight over the icefjord is a truly once-in-a-lifetime experience.

Optional helicopter flight (90 mins): this excursion is the only way you can get close to the gigantic glacier. The 12-seater helicopter departs from Ilulissat Airport sweeping over hills, lakes and ice fjords. Land on the mountain at Kangia, in the

Please ensure that your luggage is fitted with cabin tags clearly labelled with your name and cabin number. Any valuables or personal items should be kept on you throughout the day. Your luggage will be delivered to your cabin ahead of your arrival on board.

After breakfast at the hotel, board our charter flight to Cambridge Bay, where the Greg Mortimer awaits. After boarding, there is time to settle into your cabin before our important safety briefings. This evening, meet your expedition team and crew.

Day 3 At sea, Sisimiut

After a morning sailing north towards the Arctic Circle, we arrive in Sisimiut, Greenland's second largest town. Sisimiut is located approximately 54 kilometres (33.5 miles) north of the Arctic Circle, meaning that during summer, you can experience the midnight sun here. The town is famous for the old blue church with the gate made of whale bone. In the cosy museum next door to the church, you will find an excellent reconstruction of an Inuit turf house as well as exhibits of local history and early life in Greenland.

Sisimiut offers hiking trails with various degrees of difficulty. The easier trails take you through the town itself, its outskirts and

middle of the preserved area, where you can revel in the incredible surroundings. On the return flight to Ilulissat, fly above the edge of the glacier with breathtaking views of the massive icebergs drifting in the fjord. The views of some of the largest icebergs that become stranded on a moraine underneath the water, just outside the town, offers a wonderful finale to this excursion. Please note that this excursion requires a minimum of 8 passengers to operate.

Day 5 Qeqertarsuaq (Disko Island)

This compelling island seems to have more in common with Iceland than Greenland. While most of the interior is mountainous and glaciated, its beautiful shorelines boast black sandy beaches, unusual basalt columns, hot springs and dramatic lava formations. Zodiac cruise in Disko Bay, which features fascinating geology. It is also hotspot for marine life including humpback, fin, minke and bowhead whales.

Day 6 At sea, Qikiqtarjuaq, Baffin Island

Our team of experts entertain us with informative talks about wildlife, geology and epic tales of early explorers such as Franklin and Amundsen. Reaching the coast of Baffin Island, we may encounter Greenland's famous icebergs. Keep watch for whales as well as various species of seals such as ring and harp seal.

Days 7-9 Baffin Island

The east coast of Baffin Island features hidden bays that are feeding grounds for bowhead whales and where glaciers calve into the sea. Sail along inlets and fjords surrounded by towering mountains that feature impressive geology. Some of the places that we may visit include: Home Bay, Sillem Island, John Ford Fjord, Sam Ford Fjord and Scott Inlet. Conditions permitting, we hope to go ashore at Pond Inlet and be treated to a warm welcome from the local community. Covered with mountains, icefields, steep cliffs, snowfields and glaciers, Bylot provides nesting habitat for large numbers of thick-billed murres and black-legged kittiwakes. A total of 74 unique species of arctic birds thrive on this island. Due to the richness of the wildlife and the beauty and diversity of the landscapes in the area, a large portion of the island was also included in the Sirmilik National Park, established in 2001. We plan to sail along the coastline of Bylot Island, where hope to enjoy the scenery and outstanding birdlife.

Days 10-11 Devon Island, Lancaster Sound

At a latitude almost 75° degrees north, we are now truly in the High Arctic. Here, nutrient-rich waters support an abundance of wildlife, giving the area the moniker 'wildlife super highway' of the Arctic. Devon Island is the largest uninhabited island on Earth and features stunning geology, with flat-topped mountains

small-cruise-ships.com

info@small-cruise-ships.com

and glacial valleys giving Devon Island its unique character. We hope to visit Dundas Harbour to enjoy offers walks on undulating tundra, and perhaps some birdwatching. Other possible places that we might visit include Croker Bay and Maxwell Bay. A dilapidated Royal Canadian Mounted Police outpost and remnants of a Hudson's Bay Company trading post can be found here. In the bay, walrus are often present.

At the western end of Devon Island lies Beechey Island, where we plan to land. Named after Frederick William Beechey, the island is one of Canada's most important arctic sites and is a designated Canadian National Historic Site. During the Franklin expedition of 1845-46, Franklin attempted to sail through the Northwest Passage with HMS Erebus and HMS Terror, with perilous results - three of his men are buried here. Roald Amundsen landed at Beechey Island in 1903, during the first successful voyage by ship to fully transit the Northwest Passage from the Atlantic Ocean to the Pacific Ocean.

Days 12-14 Expedition cruising

Note: In true expeditionary style, our itinerary for the following days is heavily dependent on unpredictable sea ice. The following are places we hope to visit.

Prince Leopold Island

On the southern side of Lancaster Sound from Beechey Island lie the towering bird cliffs of Prince Leopold Island, a historic site

where in 1848, English explorer James Clark Ross overwintered during the search for the missing Franklin expedition. Prince Leopold Island is the most important bird sanctuary in the Canadian Arctic, with approximately 500,000 birds nesting here in summer. Ringed seals are often spotted on the sea ice around the island and polar bear often lurk nearby. The shallow gravel beds attract beluga whales, who come to moult in this part of the Arctic each summer.

Cunningham Inlet

On the north coast of Somerset Island, when factors such as weather and whale behaviour align, you might see the amazing spectacle of hundreds of beluga whales shedding their skin on shallow sandy banks. The local scenery makes for excellent guided walks, where waterway trails lead to waterfalls and higher ground.

Prince Regent Inlet, Fort Ross

Sailing down the east coast of Somerset Island, you might spot beluga whales and narwhals as they feed on the large numbers of arctic char that enter Creswell Bay in late summer. An important bird area, the bay also attracts such species as black-bellied plovers, king eiders and white-rumped sandpipers. At Fort Ross, see an abandoned Hudson's Bay Company trading outpost founded in 1937, which closed in 1949 because supply ships could not get through the thick sea ice. Enjoy guided walks on the tundra.

Bellot Strait

The Small Cruise Ship Collection

www.small-cruise-ships.com

small-cruise-ships.com

info@small-cruise-ships.com

A deep and windy waterway bordered by steep slopes, Bellot Strait is characterised by strong, swirling, tidal currents that require navigation to be undertaken close to times of slack water (four times a day). Point Zenith, the most northern continental point of the Americas is located in the strait.

Note: Due to swirling currents up to 10 knots, Bellot Strait is better transited during eastbound voyages because if it is blocked, there is the alternative to continue north through Peel Sound. On a westbound voyage, it would be necessary to make a long detour back north through Prince Regent Inlet.

Coningham Bay

Across from Victoria Strait, Coningham Bay lies on the shores of Prince of Wales Island. This is a polar bear hotspot where the majestic creatures come to feast on beluga whales often trapped in the rocky shallows at the entrance to the bay. It is not unusual to find the shoreline littered with whale skeletons - and very healthy-looking polar bears!

King William Island

Remains attributed to the Franklin expedition have been found at 35 locations on King William Island and on nearby Adelaide Peninsula. South of Cape Felix, in Victoria Strait, we hope to get close to where the HMS Erebus and HMS Terror were abandoned in 1848.

Day 15 Cambridge Bay

In Cambridge Bay, farewell the crew, expedition team and fellow travellers before a Zodiac shuttle whisks you ashore. Transfer to the airport for a charter flight to Calgary, where you will stay overnight.

Accommodation: Residence Inn by Marriott Calgary Downtown / Beltline District (or similar)

Day 16 Depart Calgary

After breakfast, check-out of your room and continue your journey.

Please Note:

In true expedition style we encourage exploration and adventure, offering flexibility in challenging environments in a way that puts you among the action to see and do as much as possible. This itinerary is only a guide and subject to change due to ice and weather conditions.

YOUR SHIP: GREG MORTIMER

YOUR SHIP: Greg Mortimer

VESSEL TYPE:

LENGTH:

PASSENGER CAPACITY:

BUILT/REFURBISHED:

Capable of negotiating the strongest winds and waves, the Greg Mortimer is built to world-class polar standards - designed in close consultation with our expedition specialists, taking advantage of our more than 25 years of experience. The Greg Mortimer redefines expedition cruising for the future, with just 132 passengers on board in the polar regions. Not only is the ship bigger to contend with adverse weather conditions, its added creature comforts make for a more enjoyable journey out on the open ocean. The Greg Mortimer remains true to our ethos and focus on multiple landings, flexible itineraries and family atmosphere - just with an improved home base! As a modern and custom-designed ship, the Greg Mortimer is at the cutting edge of nautical technology. Robust, powerful and built with our guests in mind, this ship marks a significant investment in our fleet's capabilities. From the European Arctic to the depths of Antarctica, and other far-flung destinations in-between, the Greg Mortimer will make your journey a breeze! Greg Mortimer X-BOWX-BOW™ Our expeditions face some of the worst Mother Nature can throw at us. However, this won't be problem on the Greg Mortimer with the introduction of the patented X-BOW™, created by Norwegian ship designer ULSTEIN. As one of the

leaders in marine engineering, ULSTEIN's X-BOW™ is an inverted bow concept that's been built on over 100 vessels in the shipping industry. Excitingly, we are the first expedition cruise operator to utilise this technology for the challenging open ocean waves! Hydraulic viewing platforms Although there is no doubt that you'll love the aesthetics of the Greg Mortimer, we are all here to admire the spectacular landscape and spot the elusive wildlife in their natural habitat. To ensure you get the best views possible, the new ship features unique viewing platforms, custom-built for the Greg Mortimer. Accessed from Deck 5, the two platforms fold out hydraulically for unobstructed views of passing marine life and seabirds - make sure your camera is locked and loaded! Zodiac launching platform Zodiacs are a vital part of getting up close and personal on your adventure - sneaking into areas that the Greg Mortimer can't reach. On this new ship, there are specially designed launching platforms that enables us to load Zodiacs easily and quickly, allowing you to spend more time exploring on the two to three daily landings. There are 15 Zodiacs that are boarded from either side of Deck 3 (sea level), perfect for when there is a group of fluffy cute penguin chicks that we need a photo of! Activity Platform Regardless of your destination, we offer a number of additional activities to allow you to see more of the environment. From kayaking and diving to climbing and ski touring, it's these optional activities that often leave the biggest impression on your trip as a whole. Onboard the Greg Mortimer, there is a spacious prep and loading platform for these activities and more - designed in consultation with our expert activity guides. Environmentally friendly Climate change and carbon

emissions continue to be major issues that everyone needs to be aware of and actively managing. This includes reduced emissions into the air and sea, lower energy consumption, high fuel efficiency, reduced light pollution for minimal wildlife disruption and lower on-board plastic use. It's vital to also mention the state-of-the-art virtual anchoring technology of the X-BOW™, which means the ship can float anchorless while launching Zodiacs, kayaks etc, without disturbing delicate sea floor areas. Safety features This starts with the return-to-port equipment - not compulsory on a ship of this size - which duplicates the propulsion system. This enables the ship to maintain operating systems and comfort in the event of engine failure. Furthermore, the Greg Mortimer is Polar Code 6 compliant, holds BV class and is fully compliant with the latest SOLAS requirements. It's also built with a Rolls Royce stabiliser system. If there's an incident or accident during your adventure, the ship has an on-board, fully-stocked medical centre - where our trained medical team can provide necessary treatment in a timely fashion. Safety continues to be an issue that our team takes very serious and the Greg Mortimer allows us to create an environment where you can concentrate on the brilliant landscape and wildlife, without worrying about your wellbeing. Ship Life Greg Mortimer is designed to serve your every need. It's your bedroom, bathroom, lounge, dining room and even your observatory. Make yourself at home, the Greg Mortimer is yours to enjoy! Observation Points Let's face it - you don't want windowless rooms when travelling around some of the most beautiful locations around the world. This is why the Greg Mortimer is designed with plenty of dedicated observation spaces - ideal for keen bird spotters, wildlife watchers and those wanting to watch the scenery go past. From the indoor 180-degree lounge and outdoor 360-degree open deck, both

on deck 8, to the 270-degree open sundeck on level 7, there are plenty of observation points to share around the ship! If these are full, then you can take up a spot on one of the two hydraulic viewing platforms on deck 5. Aurora Expeditions also has an open bridge policy, which means at any point you can come up to the bridge and check out what the captain and officers are up to. From watching navigational practices to observing mapping techniques, you can get a firsthand look at the inner workings of the Greg Mortimer. Shore excursions Although the ship is fun, the real enjoyment comes from the many shore excursions that are available. Depending on the weather and itinerary, it's possible to take two to three landings daily, taking a look at everything from rock formations and ancient ruins to cute groups of penguins. We know time is of the essence in these wild locations, so the Greg Mortimer has been designed with 15 Zodiacs, which means you can maximise your time on shore. From four dedicated sea level launching platforms, transfers are quicker, safer and enable you to get closer to the action for a longer period of time. Just remember to charge your camera before you step onto the Zodiac! Activity options From kayaking and skiing to diving and climbing, these are one-in-a-lifetime opportunities that you need to take advantage of. Aboard the Greg Mortimer there is a specially designed launching platform for all activities, a concept overseen by our activity experts. This area also includes individual lockers in the expansive mudroom and rapid drying areas for wetsuits so you can quickly get warm after exploring in the elements! Dining From the moment you step onto the Greg Mortimer, we aim to give you the best hospitality service possible. Starting with the official Captain's welcome, as our guests, you're welcome to 24 hours complimentary coffee, tea and snack facilities in addition to the range of different menu

options and courses for each meal. Meals are served in large dining room/restaurant with family style dining, perfect to swap stories with your new expedition family. Enjoy the range of house wine, beers and soft drinks included with dinner after a long day in the wild, preparing yourself for another exciting day to follow. On the last day of your trip, the team on the Greg Mortimer put on a special farewell four-course dinner and cocktails - a perfect way to reflect on your time on the ship and consolidate lifelong friendships with the people you've met on-board. On-board entertainment When you're relaxing during a sea day or you have a little downtime on the ship between excursions, what is there to do onboard the Greg Mortimer? Plenty! On all our expeditions, there are experts who lead presentations in the spacious lecture room so you can understand the region a little better. These often include topics as broad as history and culture to biology and climate change, these presentations aim to educate and entertain. If you're keen to just watch the surroundings and keep your eyes peeled for wildlife, you have access to two bars/lounges where the stunning floor to ceiling windows offer a special perspective on the landscape. The Greg Mortimer is also decked out with other facilities for your enjoyment. There is a library on Deck 5 with books and maps and a Wellness Centre complete with gym equipment, sauna and spa. Feeling a little sore after walking around all day? Treat yourself to a massage at the Wellness Centre and feels the aches disappear! Keen photographers and artists will revel in the multimedia room

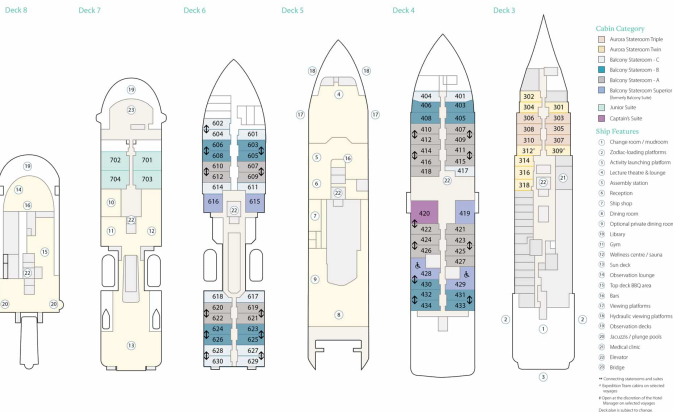

on Deck 5.
